

You are here

Take control of your emotional health

“How are you doing?”

It's a standard greeting. And you might offer a quick “Fine, thanks,” in response. But when you know how you feel, you can improve your emotional health.

So how are you doing? MindCheck® online tools help you find the answer.

Your emotional health contributes to your overall health

Part of being healthy involves taking care of your feelings. For example, positive thinking is linked to health benefits that include¹:

- Faster recovery
- Better sleep
- Fewer colds
- Greater sense of happiness
- Longer lifespan²

We all have good days and bad days, good moments and bad ones. MindCheck online tools help you manage your emotional health and focus on the positive. And with practice, you can start feeling better overall.

Find out where you stand

How do you feel? How do you want to feel? You can't plan a route to where you want to go until you know where you are.

The MindCheck online tool asks you four simple questions so you can be aware of how you're feeling. You'll be matched to a color and level to provide insight into your emotional health.

And the MindCheck site tracks your history, so you can see how your results change over time.
